LEBLON

You have arrived on a new journey And Leblon now graces you The sea and sun makes you relax No rush to return Make this house a home From the rumble poetry Because here the city pulses With dynamism and harmony

A CHARMING AND ELEGANT NEIGHBORHOOD

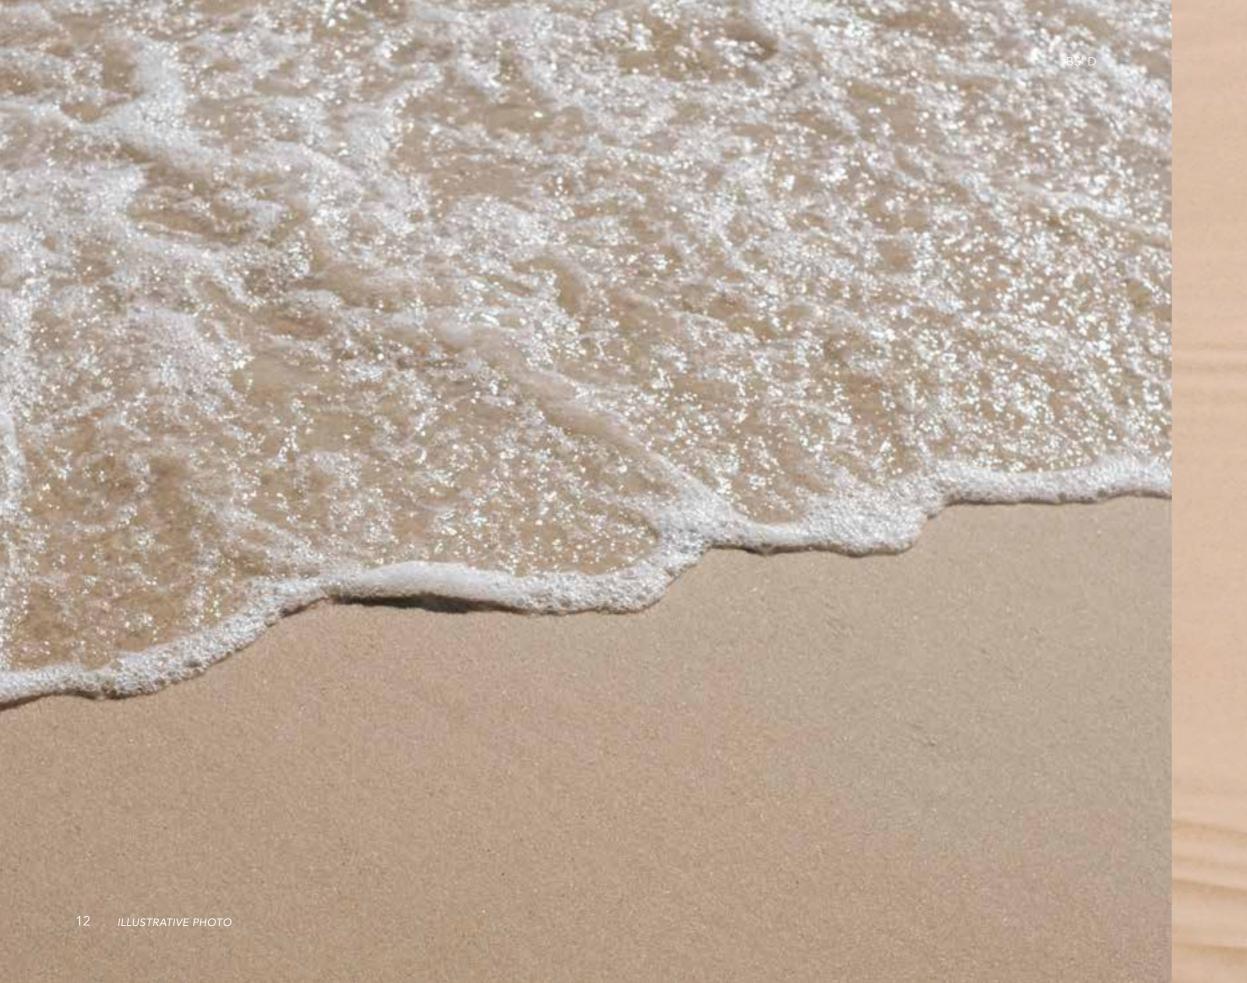

Unique with its forms, in verses, melodies or poems, life is present. Embrace of nature, beauty that ecstasy, purity that inspires, the neighborhood brings joy

Full of charm, Leblon has Morro Dois Irmãos as its backdrop and Rio's life made of breeze, sand, salt, sea and love.

THE NEIGHBORHOOD

WHERE THE SUN, THE MUSIC AND POETRY MAKE YOU SHIVER.

ILLUSTRATIVE PHOTO

LOCATION

UNUSUAL, SINGULAR AND STUNNING

Overlooking the sea at Leblon, its calm, elegance and scenery are inspirations for the most beautiful verses and days. Located on Bartolomeu Mitre, on the very first block from the beach, Areia combines exclusivity with sophistication.

Admiring its beauty and charm, walking its streets, looking at the sea up close, enjoying the sunset and iving the best that the Rio style has to offer, makes the days be surprising.

A SPECIAL AND PRIVILEGED PLACE IN LEBLON.

THE PRIVILEGE OF LIVING IN A POSTCARD

WHERE SIMPLICITY IS EVERYDAY

Here, the way of life is diverse and with countless possibilities involving natural beauty, sport, bohemian life, gastronomy and nightlife. All in one place and just steps away from each other.

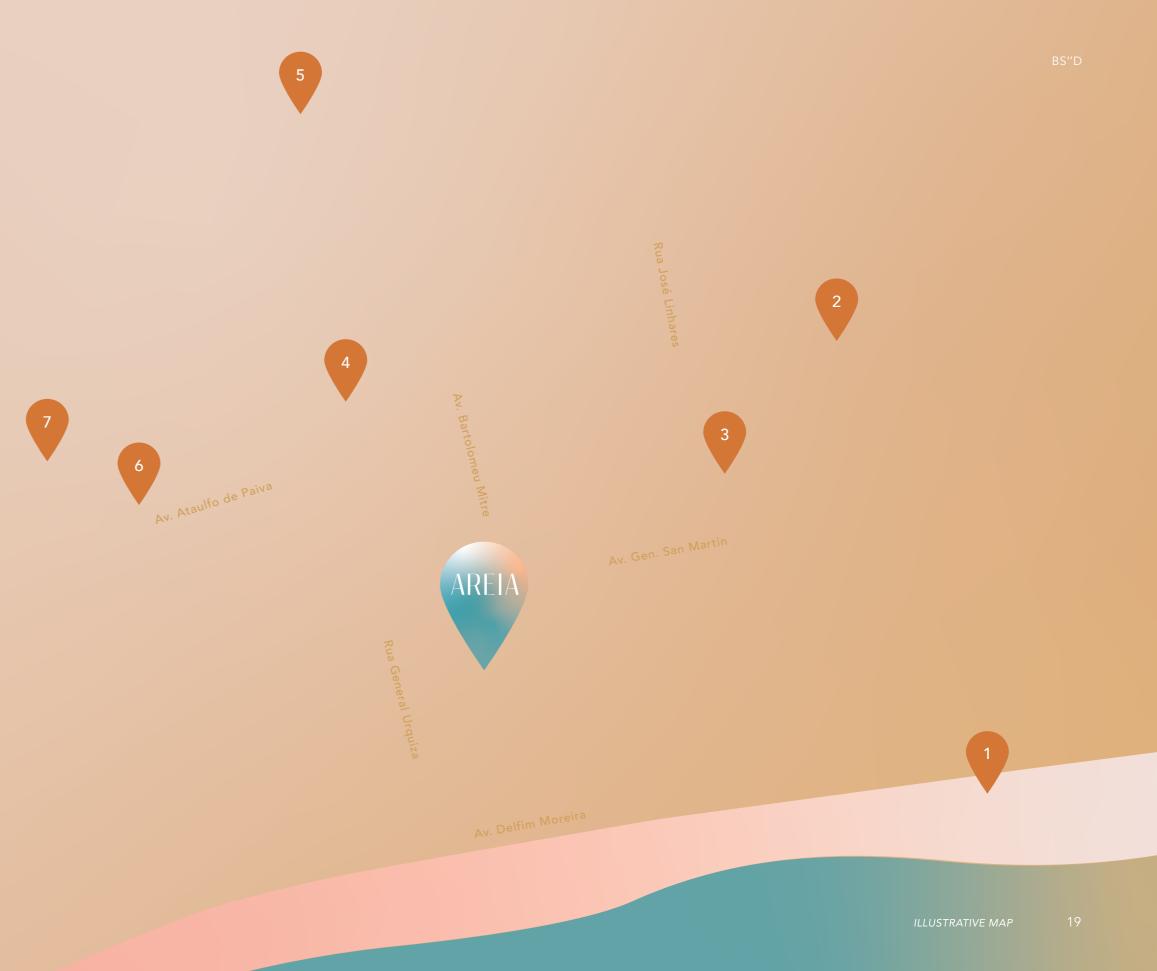

Residence of exclusive restaurants, premium stores, cozy bars, coffee shops, designer stores and renowned schools. The daily life of the neighborhood becomes simple, practical and pleasant.

ARCHITECTURE

RIO SOUL AND FINESSE IN EVERY DETAIL

ARCHITECTURE

Escaping a commonplace, the project exudes elegance and subtlety, expresses beauty with its effects between materials, brings softness and carries all the lightness of sunny days with its integration with the surroundings.

With a façade and interior designed by the renowned architect David Bastos, Areia unites authorial design with comfort, the functional with the conceptual and sustainability with the optimization of resources, building a high standard development.

IVE. DECORATION AND FINISHINGS AND LANDSCAPES ARE MERELY ITURE AS WELL AS THE FINISHING MATERIALS ARE OF COMMERCIAL DETHE CONSTRUCTION CONTRACT. THE PROPERTY AND PROJECTS BE DELIVERED AS INDICATED IN THE DESCRIPTIVE MEMORANDUM.

Kath and American

DAVID BASTOS

⁻acade and interiors

Graduated in architecture from the Federal University of Bahia, David Bastos belongs to a family of doctors, but he decided to transform the urban landscape of Salvador, his hometown. In 1995, he installed his office on a warehouse in the docks area of the Bahian capital, promoting a revitalization of the place.

His projects stand out for their comfort, informality and respect for the space's characteristics. He likes to work mixing old and new, betting on the effect of materials. His refined style left marks on the Bahia landscape with elegance and subtlety. His company operates nationally and internationally and is specialized in the creation, execution and production of architectural urbanistic and commercial and residential decoration projects. "Situated in Rio de Janeiro, more precisely in Leblon, a neighborhood where there is a lot of life, the development is in a privileged location, on the beach block, close to bars and restaurants. And because of that, it was designed to be a house integrated with nature, with natural tones and textures, such as sand, which ended up becoming the name of the building. The use of natural materials and large glass openings were the premises used in the design of the facade, which does not have a great variety of elements or colors, remaining minimalist, but without losing its elegance.

In common areas and apartments it was no different. We brought the same concept to the entire project, emphasizing neutral tones, choice of natural materials and the concept of biophilia, which is nothing more than giving value to living things, promoting wellbeing and emotional comfort."

INÁCIO OBADIA

Project author

The I. Obadia Architecture and Planning office has been working since 1974 in architectural projects aimed at building enterprises that add value and importance to the place where they are located. Much of his work consists of multifamily buildings, always concerned with meeting the demand and desire of companies and future residents. Quality is the focus of his development. "It's impossible not to rejoice when executing yet another architectural project where Areia will be built. Close to the sea, the sun, the sky, the blue! Located on Leblon beach block, on Bartolomeu Mitre, the project inspires us to do our best.

The building has 7 typical floors, with 2 units each and comprising a living room and 4 suites. The top floor units have outbuildings on the roof with swimming pool, sun and a view of the sea in Leblon. In the basement and on the ground floor, each unit has 3 parking spaces and for the duplex units, 4 parking spaces.

On the ground floor, the lobby is refined and sophisticated, following the same pattern as the apartments and leisure area with swimming pool, spa, fitness and relaxation and massage area. It's another project that fulfills us professionally, it gives us immense pleasure and I want to want more!"

YOUR HOME FULL OF BOSSA AND PERSONALITY

YOU IDEALIZE THE PLAN YOU WANT AND MOZAK MAKES IT FEASIBLE *

From conception to delivery, Mozak strives to develop unique solutions that meet your needs and make you feel at home. Our specialized and capable team will be available to guide you in whatever you need.

THE PROJECT

Areia is a project integrated with the surroundings, where the noise of the sea sounds like poetry, the breeze embraces and the charm inspires living full of affection.

Aiming at valuing the neighborhood in which it is located, the development brings concepts of urbanism, beauty, safety and well-being, with a new construction and use of the most modern technologies.

MOZAK

Behind a company with over 27 years of experience are organizational management processes that increase productivity and assertiveness. Throughout its trajectory, Mozak has learned a lot and tightened its procedures, closely following the productivity and needs of all its sectors, in addition to drawing strategies to achieve its goals and deliver excellence to its customers.

Today, we can say that we are one of the few mid-sized companies in our segment that is certified by ISO 9001:15 This is just the beginning of an intense progress towards professionalization in our company's strategic planning.

$|\mathbf{S0} \ \mathbf{9001}|$

ISO 9001 is a quality management system, with a set of guidelines that seek to standardize and verify company processes based on continuous improvement.

This certification was a very important step for us. We offer even more confidence to our client, who throughout the relationship with Mozak will be guaranteed a high quality service and, at the end of the work, a product that will exceed their expectations.

We assume with our customers and partners the commitment to always be in search of excellence.

4. Air-conditioning system

According to a specific project to be developed by a specialized company.

According to the specific project to be developed by a specialized company, the piping, power cable and control of the connection from the evaporator unit to the condenser, in addition to a drain) for the installation of a Split-type refrigeration system, serving points in all rooms, suites and living rooms, with the purchasers of the units

For the common areas, the locations to be heated with the same system as the the common areas of the building.

5. Gas and Water Heating System

system for the bathrooms and kitchens, as well as a gas point for stoves in the

with the Concessionaire.

According to the Building Automation Project, the necessary infrastructure (dry units will be determined by the construction company, and the equipment and

specific automation project.

B. TECHNICAL SPECIFICATIONS

3. Hydrosanitary and Stormwater Installations

Concessionaire will be followed. 3.1. Material:

Sewage piping: in PVC pipes, Tigre, Amanco, Akros Fortilit or Brasil brands.
Pipes for grease and rainwater: in PVC/R series pipes, Tigre, Amanco, Akros Fortilit or Brazil.

- Drawer records: Fabrimar, Deca or Docol brands.

3.2. Porcelain:

Fabrimar, Deca, Incepa or Roca brands will be specified.

3.3. Metals:

Fabrimar, Deca or Docol brands will be specified.

3.4. Motor-pump set:

Jacuzzi, Schneider, Dancor, Darka, Worthington or Marck booster pumps will be installed and delivered.

4. Electrical Installations

The recommendations and standards of the manufacturers and the local Dealer will be followed.

4.1. Materials:

• Wires and cables: in electrolytic copper of the Prysmian, Ficap, Forest, Imbrac, Pirelli, Conduspar, Reiplas or IPCE brands.

- Conduit: in rigid or flexible PVC of the Tigre, Fortilit, Amanco, Suprema or Cipla brands.
- Distribution Boxes and Switchboards: in metallic or PVC boxes with doors of the Eletromar, Pial, Tigre, Steck, Cemar, Siemens, GE or Internacional brands.
- Protection Devices: Siemens, GE, Lorenzetti, Eletromar or Lousano circuit breakers.
- Switches and sockets in the bathrooms of the autonomous units and common areas: Pial, Siemens, Prime or Bticino brands.
- Lighting Appliances: the common social areas of the building and the balconies and terraces of the autonomous units will be equipped with lighting fixtures, according to models and location of the specific project, and will be part of the expenditure forecast for the humanization of the common areas of the building.

5. Fire Fighting Facilities

The necessary fire-fighting and prevention equipment will be installed only in the common parts, according to the Fire Department rules. The dimensioning will follow the project to be developed and approved by the Fire Department and the cost will be included in the budget for Occupation Permit and Definitive Connections.

6. Aluminum frames

The frames will be in aluminum, applied to the facade of the building, and will follow the determination of the specific project in its dimensions, manufacturers, finishes and accessories

7. Glasses

The glass windows will have a thickness compatible with the span of the aluminum frames. The finishes will follow the determinations of the facade of the enterprise.

8. Facade

The composition of finishes and shapes will follow the determinations of the specific architectural project to be developed.

C. FINISHES OF COMMON AREAS

1. Estacionamento e Rampa de acesso subsolo

- Floor: Smooth Cement
- Wall: Latex Painting
- Ceiling: Stripped slab with latex paint

2. Trash deposit

- Floor: Smooth Cement
- Wall: Latex Painting
- Ceiling: Stripped slab for latex painting
- Door: Anodized aluminum or painted iror
- Ceiling: Waterproof concrete
- Door: Anodized aluminum or painted iron

3. Subsoil Deposits

- Piso: Cerâmica das marcas Portinari, Portobello, Eliane
- Parede: Cerâmica das marcas Portinari, Portobello, Eliane
- Teto: Laje desformada para pintura látex
- Soleira: Tipo filete em granito ou mármore
- Porta: Alumínio anodizado

4. Technical compartments

- Floor: Porcelain
- Wall: Ceramic
- Ceiling: Plaster recess for plastic painting
- Equipment: Granite countertop with stainless steel tub and table tap
- Door: Smooth wooden door with semi-hollow opening, finishing in white enamel paint

 Hardware: Yale, Art Aço, La Fonte, Pado or Papaiz brands, in brass or stainless steel

5. Water tank

- Floor: Waterproof concrete
- Wall: Waterproof concrete
- Ceiling: Waterproof concrete
- Door: Anodized aluminum or painted iron

6. Technical Area of the 8th floor (room)

- Floor: Portinari, Portobello, Eliane ceramics
- Wall: Portinari, Portobello, Eliane ceramic

7. Roof (slab above dependencies)

• Floor: waterproofed slab

8. Pantry

- Porcelain floor
- Wall: Ceramics
- Ceiling: Plaster recess for plastic painting
- Equipment: Granite countertop with stainless steel tub and table faucet
- Door: Smooth wooden door with semi hollow opening, finishing in white enamel paint
- Hardware: Yale, Art Aço, La Fonte, Pado or Papaiz brands, in brass or stainless steel

9. Locker room

- Floor: Porcelain
- Wall: Ceramic
- Ceiling: Plaster recess for plastic painting
- Sill: Fillet type in granite or marble
- Equipment: Granite countertop, built-in porcelain bowl and table faucet
- Toilet with dualflux coupled tank
- Manual hygienic shower
- Wall shower and handle finishes
- Door: Smooth wooden door with semi-hollow opening, finishing in white enamel paint
- Hardware: Yale, Art Aço, La Fonte, Pado or Papaiz brands, in brass or stainless steel

10. Front Ground Clearance, Sidewalk in front of the building, Lobby, Stairs, Hall of Floors, Bike Racks, Accessible Bathroom, Sauna, Spa, Rest, Pool, Fitness and Multi-purpose Room

The specification of these compartments included in the budget is in the bone (unfinished). All finishes in these areas will be defined during the development

of the decoration projects and their costs will be included in the decoration budget (furniture fund).

D. DECORATION OF COMMON PARTS

1. Decoration

A personalized interior design will be developed, contemplating the social common areas of the development.

The project, acquisition, differentiated finishes and assembly of equipment and furniture may be part of the expenditure forecast for the humanization of common areas of the building.

2. Landscaping

A specialized company will be hired for landscape design and execution. The project, land preparation, acquisition of substrate, plants and planting may be part of the expenditure forecast for the humanization of the common areas of the building.

3. Visual programming

A graphic communication project will be developed for the enterprise, covering the common social and access areas of the enterprise.

The design, acquisition and installation of all belongings may be part of the expenditure forecast for the humanization of the common areas of the building.

4. lighting technique

A lighting design project may be developed for the project, covering the common social and access areas, in addition to the project's facade. The design, acquisition and installation of all belongings may be part of the expenditure forecast for the humanization of the common areas of the building.

E. FINISHES OF AUTONOMOUS UNITS

- 1. Room, Bedrooms, Suites, Detention and Circulation
- Floor: Porcelain
- Wall: latex paint
- Ceiling: Plaster for plastic painting
- Skirting: In wood with enamel paint finish or aluminum angles
- Internal doors: Smooth wooden door with semi hollow opening, finishing in white enamel paint
- External access doors (living room) and hardware: It will follow the determination of the project for the decoration of the enterprise, and may be part of the expenditure forecast for the humanization of the common areas of the building
- Hardware: Yale, Art Aço, La Fonte, Pado or Papaiz brands, in brass or stainless steel

2. Balconies:

- Floor: Porcelain
- Wall: Will follow the design determination for the development's facade
- Ceiling: Will follow the design determination for the development's facade
- Skirting: Will follow the design determination for the development's facade
 Ceiling: Plaster recess for plastic painting
- Sill: Will follow the design determination for the development's facade
- Frame: Will follow the design determination for the development's facade
- The balconies will be delivered with a "glass curtain" type closure, with a retractable system, in colorless and translucent material, respecting all the provisions of Complementary Law 145/2014, the replacement of the model and specifications of the standard determined by the Construction Company is prohibited in order to preserve the facade of the development. Closing will not guarantee total watertightness, and water may pass through in case 6. Cozinha of rain.
- The balconies will be delivered with the floor level in relation to the other Wall: Ceramics rooms adjacent to it, in order to promote the integration between the • Ceiling: Plaster recess for plastic painting

3. Garden terraces and penthouse outbuildings

- Floor: Porcelain
- Wall: Will follow the design determination for the development's facade
- Skirting: Will follow the design determination for the development's facade
- Sill: Will follow the design determination for the development's facade
- Frame: Will follow the design determination for the development's facade
- tub and faucet and forecast of hydraulic and electrical points for an electric Sill: Fillet type in granite or marble countertop barbecue grill will be delivered.
- Pool: The hydraulic and sewage installation will be delivered, as well as the Swimming pool heating is not included.
- External shower: It will follow the determination of the project's interior design, being a shower and forecast of hydraulic points only for cold water.

4. Banheiros

- Floor: Porcelain
- Wall: Latex Paint
- Sill: Fillet type in granite or marble
- Equipment: Granite countertop, sink in built-in porcelain and table mixer, **F. GENERAL OBSERVATIONS** toilet with dualflux coupled box, manual hygienic shower
- Door: Smooth wooden door with semi-hollow opening, finishing in white enamel paint
- stainless steel

5. Lavatory

- Floor: Porcelain
- Wall: Ceramic

- Door: Smooth wooden door with semi-hollow opening, finishing in white enamel paint
- Hardware: Yale, Art Aço, La Fonte, Pado or Papaiz brands, in brass or stainless steel

- Floor: Porcelain

- Door: Smooth wooden door with semi hollow opening, finishing in white enamel paint
- stainless steel

7. WC

- Wall: Ceramic

- Equipment: Porcelain sink and table tap, toilet with dualflux coupled tank,
- enamel paint
- stainless steel

8. Access ladder to the roofs' dependencies

- Structure: Concrete

1. This is just a preliminary specification for the initial construction budget. During the design phase, a definitive specification will be prepared by the construction company to be informed to customers. Therefore, the above items may change **2.** In the interest of the smooth progress of the work, the construction company may replace equipment or materials that are lacking in the market at the time of purchase or that become inaccessible as long as the same quality is maintained, technical solution or aesthetics.

3. Items excluded from the common parts in the estimated budget according to the Construction Contract: execution and decoration project; sound design and execution; execution and anchoring project; landscaping design and execution; garage gates, intercom, cctv, perimeter sensing, access control, alarm, collective (marble, granite, special paintings, wallpaper, joinery, mirrors, defined in the decoration project in common parts); porcelain, ceramic, plaster lining or special requested by the concessionaires; collective and/or parabolic antenna. In addition Company.
